

# PAINTABLE SILICONE

**MASTERS® PAINTABLE SILICONE** creates a water-tight, mildew and crack resistant seal, making it ideal for kitchen, bath and laundry rooms. The tube is easily squeezed by hand to give a consistent bead in tight spaces where a caulking gun simply can't reach. The re-sealable cap prevents product from drying out after opening.

**MASTERS® PAINTABLE SILICONE** is rated for interior and exterior use from -20°F to 180°F (-29°C to 82°C) once cured. It has superior flexibility and adhesion characteristics making it ideal for:

- Tub/shower surrounds
- Kitchen, bath, and laundry room sinks
- Countertops and backsplashes
- Tiling
- Window frames
- Siding

## Directions:

- All surfaces must be clean, free of dirt, oil, old silicone and other debris that could deter adhesion.
- Remove cap and cut nozzle to desired angle and opening size.
- Run a continuous bead along the joint, keeping the squeeze tube ahead of the nozzle.
- Tool to a smooth finish. Excess, uncured sealant can be removed with soap and water.
- Allow **MASTERS® PAINTABLE SILICONE** to cure fully before exposing to water (approx. 72 hours).
- Dries to touch and latex paintable in approx. 2 hours (24 hours for oil based paint).
- Cleans up with water prior to curing. Clear sealant applies white and dries clear.
- Store and apply between 40°F and 90°F (4°C to 32°C).

| Catalogue Number | Description   | Quantity Per Case | Approximate Case Shipping Weight |        |
