

INSTRUCTION GUIDE

TWIST-N-SET® REPLACEMENT TOILET FLANGES

Oatey Twist-N-Set Replacement Toilet Flanges are designed to replace broken toilet flanges with a gasket that expands to fit inside of drainage pipe. The replacement flange installs easily without tools and features a smooth, unrestricted flow design. Oatey products have earned the trust of plumbing professionals for over 100 years.

- 1** Remove old toilet flange.
- 2** Thread rubber gasket onto flange until the gasket expands to meet the inside walls of the soil pipe.
- 3** Tilt and twist flange until gasket begins to grip pipe.
- 4** Level and push the flange flush with the floor while using the toilet bolts to complete the tightening process. Align the flange and screw it into the floor.
