DESIGNLINE® LINEAR SHOWER DRAINS TECHNICAL SPECIFICATION

DESCRIPTION

Oatey® DesignLine linear shower drains shall be used in residential and commercial applications when connecting to a DWV system. The drain body is constructed of durable and corrosion resistant 304-grade stainless steel with pre-sloped channels to ensure proper water evacuation. Drain height can be modified using the adjustable leveling feet. The 2 in. PVC outlet adaptor threads into a compatible PVC or ABS clamping collar drain base. Strainer shall meet all necessary load and flow requirements for installations in shower areas. Drain kit includes a stainless steel debris basket and cover removal tool.

DRAIN ASSEMBLY INCLUDES

- 304 grade stainless steel drain body
- 304 grade stainless steel cover
- 2 in. PVC threaded outlet adapter
- Cover removal tool
- 304 grade stainless steel debris basket

REQUIRED PARTS (NOT INCLUDED)

- Oatey 130 Series Shower Pan Drain with clamping collar (ABS or PVC)
- Oatey PVC or CPE shower pan liner
- Oatey X-15 Bonding Adhesive for use with PVC shower pan liner or OateyWeld for use with CPE shower pan liner

130 SERIES SHOWER PAN DRAIN (SOLD SEPARATELY)

ABS or PVC Drain Base with Clamping Collar

Designed for use with tile or marble showers where a shower pan liner is used. The countersunk holes are used to secure the flange base to the subfloor with an approved fastener. The shower pan drain shall have a solvent weld connection over 2" Sch. 40 DWV hub connection or inside 3" Sch. 40 which conforms to ASTM D2665 (PVC) or D2661 (ABS). Base accepts 130 series 1/4 Turn Test Plug, which holds 40 ft of head pressure. Clamp collar ring fastens by use of hex bolts that thread into brass inserts and can be inverted to achieve an additional 1" in finished height. Drain base accepts 2" threaded outlet adapter which connects to Designline stainless steel drain body.

APPROVALS AND LISTINGS

- Uniform Plumbing Code
- International Plumbing Code
- National Plumbing Code of Canada
- ASME A112.18.2-2020 / CSAB125.2-20
